

LIFE SCIENCES—OPERATIONAL EFFICIENCY

Industry Insider

See how our partner Honeywell Life Sciences empowers customers to tackle challenges in the life sciences industry. From big-picture problems to the specific needs of an IT director, Honeywell has it covered.

TrackWise Quality is a cloud-based quality management system (QMS) built on Salesforce to transform and digitize quality management processes from end to end.

Here's how TrackWise Quality helps IT directors create a streamlined quality management ecosystem.

Increase Operational Efficiency

Harness the power of digital and AI to create a more efficient and effective quality management program.

Accelerate Time to Value

Experience quick and easy integration and adoption with a quality management system built on the Salesforce Platform.

Enable Digital Transformation

Say goodbye to manual processes and siloed systems with a modern quality management solution.

Keep reading to see how TrackWise Quality can help an IT director digitize quality across the enterprise for greater operational efficiency.

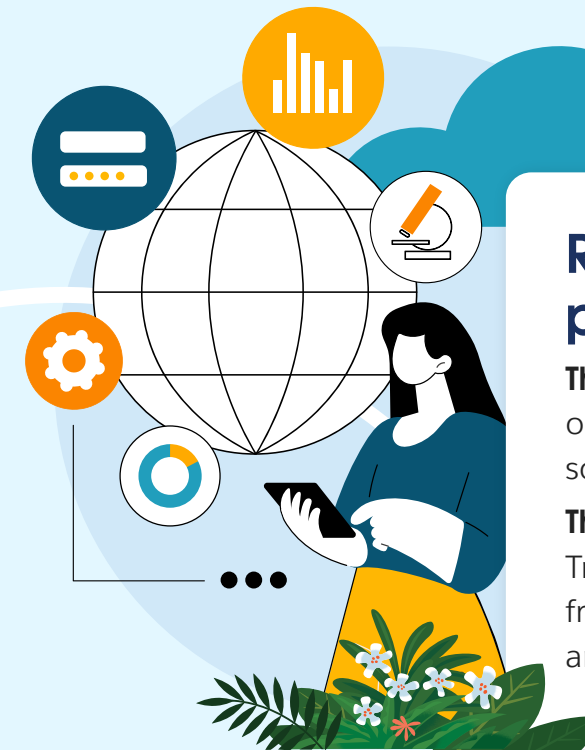

The Solution

TrackWise Quality helps life sciences companies shift from reactive to proactive quality management.

Reduce IT costs while improving business operations.

The Challenge: IT leaders are under constant pressure to rationalize their IT spend while sustaining a modern and efficient ecosystem that effectively supports growing business needs.

The Solution: TrackWise Quality automates quality processes while eliminating inefficiencies. Its SaaS deployment and easy integration with third-party systems save both time and money.

Remain flexible with open platform interoperability.

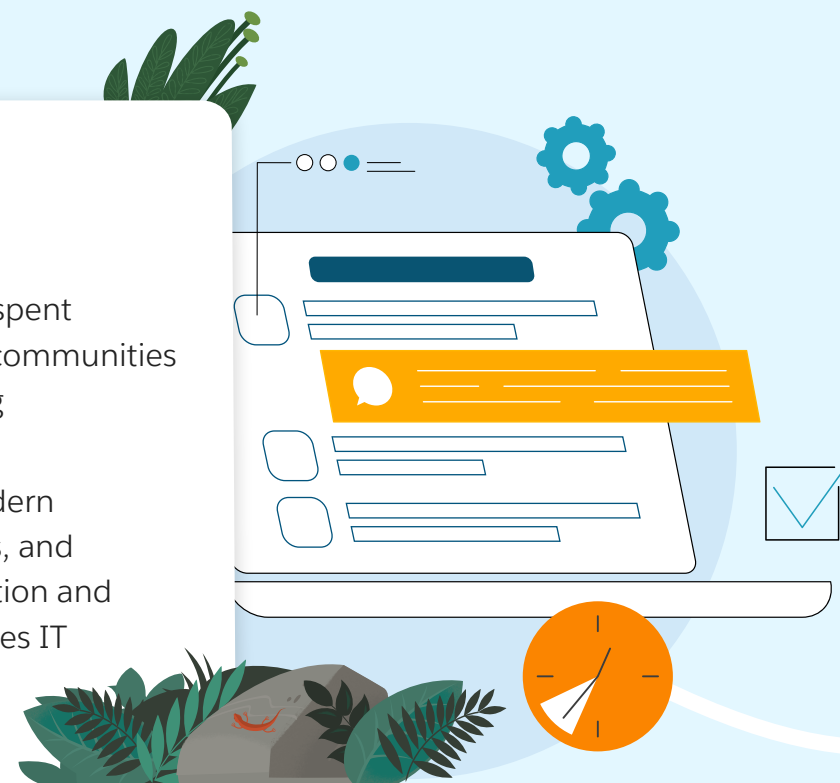

The Challenge: Vendor lock-in can inhibit an organization's freedom to choose the best solutions to meet their business needs.

The Solution: Built on the Salesforce Platform, TrackWise Quality offers the flexibility to choose from a global ecosystem of technology resources and software vendor solutions.

Minimize IT training and support.

The Challenge: The amount of time spent supporting IT systems and their user communities takes resources away from performing value-added activities.

The Solution: TrackWise Quality's modern user interface, standardized processes, and intelligent forms allow for quick adoption and easy self-service. This drastically reduces IT time spent on support.

Do more with less.

The Challenge: Many life sciences companies experience ongoing pressure to bring new products to market quicker, with fewer resources, while still maintaining high-quality standards.

The Solution: TrackWise Quality streamlines complex quality processes through automation, data field reduction, and workflow capabilities. This increases productivity without adding headcount.

The Scenario

In this example, let’s imagine how an IT director can implement TrackWise Quality to deliver new products to market faster while ensuring quality.

Quincy Quality

IT Director

Quincy is responsible for establishing and maintaining a secure IT infrastructure that supports the delivery of innovative products at scale. By enforcing quality standards and preventing problems before they occur, Quincy can help his organization lower the risk of recalls and keep consumers safe.

His Goals:

- Align technology with R&D goals
- Enhance operational efficiency
- Maintain industry compliance

His Challenges:

- Support an expanding IT environment
- Reduce costs and IT complexity
- Balance user needs with technology requirements

TrackWise Quality solves Quincy’s challenges by helping him to:

Focus on strategic goals.

Built on Salesforce and leveraging the Life Sciences Cloud, TrackWise Quality supports the standardization of systems, processes, and data formats to simplify workflows. This frees up Quincy and his team to focus on their core business goals.

Optimize processes.

TrackWise Quality automates and centralizes quality and compliance, eliminating error-prone manual processes and consolidating application and data silos into a single system with actionable insights.

Reduce costs.

By transitioning from outdated on-premises systems to a cloud-based, AI-powered solution, Quincy can slash application support and maintenance time while empowering users to proactively manage quality.
